	Sound 1 /æ/	Sound 2 /ɑ:/	
	cap What a lovely cap!	carp What a lovely carp!	
	hat He touched his hat.	heart He touched his heart.	
	cat It's a farm cat.	cart It's a farm cart.	
	ban There's a ban on it.	barn There's a barn on it.	
	pack I'll pack the car.	park I'll park the car.	

PRONUNCIATION Suffixes and Syllable Stress

When the suffixes *-(t)ion*, *-ity*, *-ic*, and *-ical* are added to words, the stressed syllable can change. The syllable just before each of these suffixes receives the main or primary stress.

-(t)ion (noun ending)

e•du•cate—*e•du•ca•tion*

-ic (adjective ending)

sci•ence—*sci•en•ti•fic*

-ity (noun ending)

pro•ba•ble—*pro•ba•bi•li•ty*

-ical (adjective ending)

hi•sto•ry—*hi•stor•i•cal*

10

E Underline the syllable that gets the main stress in each word. Listen to check your answers. Then practice saying the words.

1. va•ca•tion

2. ba•sic

3. i•den•ti•ty

4. me•di•cal

5. spe•ci•fic

6. ques•tion

7. u•ni•ver•si•ty

8. mu•si•cal

9. di•rec•tion

10. e•lec•tro•nic

11. ac•ti•vi•ty

12. ty•pi•cal

10

F Say the words in the box with a partner. Then complete the sentences with the words.

availability
economical

information
location

presidential
technological

1. The nurse was well informed. He gave me good information.
2. Yoga classes sound good, but I don't know about their availability in my city.
3. Anna knows a lot about technology, and we have a technological problem. Let's ask her!
4. She is not the company president, but her blue suit looks presidential, I think.
5. I can't find the gym on this map. Do you know the location?
6. I like eating at restaurants, but eating at home is more economical.

UNIT 1: HEALTHY LIVES

Lecturer: Quynh Trang, MA.

What should you do
when you ...?

have/ catch a cold/ flu

Name some health problems
with “-ache”?

toothache, earache, stomachache,
headache, backache, etc.

- Eating lots of foods high in saturated fat and trans fat may contribute to heart disease.
- Eating foods high in fiber and low in saturated fats, trans fat, and cholesterol can help prevent high cholesterol.
 - Limiting salt (sodium) in your diet can also lower your blood pressure.
 - Limiting sugar in your diet can lower your blood sugar level to prevent or help control diabetes.
- Do not drink too much alcohol, which can raise your blood pressure. Men should have no more than 2 drinks per day, and women no more than 1 drink per day. For

Summarize what people can do to prevent heart disease

- Have a healthy/ balanced diet
- Keep a healthy weight
- Get regular physical activity

People with overweight or obesity have a higher risk for heart disease. Carrying extra weight can put extra stress on the heart and blood vessels.

Physical activity can help you maintain a healthy weight and lower your blood pressure, blood cholesterol, and blood sugar levels. For adults, the Surgeon General recommends 2 hours and 30 minutes of moderate-intensity exercise, like brisk walking or bicycling, every week. Children and adolescents should get 1 hour of physical activity every day.

How to say you have an allergy to something?

- I have an allergy to ...
- I'm allergic to ...
- I'm hypersensitive to ...
- I suffer from allergies triggered by ...
- I experience allergic reactions to ...
- Exposure to... sets off my allergies
- triggers an allergic response in me
- Contact with... provokes an allergic reaction

Do you have unhealthy habits?

- ☐ unhealthy habits ~ bad/ harmful habits// unhealthy/ negative lifestyle choices// unhealthy/ negative lifestyle patterns

YES:

- Reasons?
- Some unhealthy habits and their negative effects?
- Intention to change? (develop positive habits and replace unhealthy patterns/ adopt a healthier lifestyle)

NO

- Why not?
- Benefits? Examples?

Do you eat a lot of vegetables and fruits?

- ☐ eat a lot of vegetables and fruits ~ eat/ consume plenty / large portions/ many servings of vegetables and fruits// fruits and vegetables make up a large/ major part of my diet

YES:

- Reasons?
- Examples of kinds of fruits & vegetables you eat? How much?
- Benefits?

NO

- Why not? Your dietary preferences?
- Changes in the future? (increase my intake of fruits and vegetables/ prioritize the inclusion of fruits and vegetables in my diet)

What should you do
when you ...?

have a fever/
temperature

Summarize the ideas

Benefits of eating fruits and vegetables

Most people know that fruits and vegetables are good for us. Both fruits and vegetables are high in **dietary fibre** as well as **vitamins and minerals**, and other bioactive plant compounds, including many with antioxidant properties such as **polyphenols** or beta-carotene. Fruits and vegetables contain, for example, **vitamin A, B5, folate, C, E & K** and are a rich source of **calcium, iron, magnesium, manganese and potassium**.² The amounts and types of nutrients vary between different types of fruits and vegetables. Fruits and vegetables are also high in water, ranging from 75-90% of their weight. This fact explains their low energy content. Fruits and vegetables usually contain traces of **fats** and **protein**, with a few exceptions such as avocados, which have a high fat content. There is no evidence that **organic** fruits and vegetables are more nutritious compared to conventional varieties.³⁻⁵

The European Food Information Council

Eating a lot of fruits and vegetables is strongly associated with a lower risk of premature deaths and **non-communicable diseases**; particularly, cardiovascular diseases, such as coronary heart disease and stroke, and certain cancers. Eating fruits and vegetables is also linked to a lower risk of other diseases, including **dementia**, certain eye diseases, **rheumatoid arthritis**, **osteoporosis**, **asthma**, chronic obstructive pulmonary disease, depression, **pancreatic diseases** and hip fractures, although with a lower strength of evidence.^{6,7} Furthermore, diets high in fruits and vegetables may prevent weight gain, the most important risk factor for type 2 diabetes.

Main ideas?

In the UK, 40% of children have been diagnosed with an allergy. The four most common allergies in children are food allergy, eczema, asthma, and hay fever. Allergy symptoms can affect all aspects of a child's day to day life, including their health and wellbeing, education, and social activities.

Shellfish is the most common allergen for adults, followed by peanuts and tree nuts, according to the Asthma and Allergy Foundation of America (AAFA). For children, the most common allergens are milk, eggs and peanuts.

Use different expressions to replace the verb “get”

/ɑ: 'θrɑrtɪs/

Many musicians who get arthritis experience the tragedy of no longer being able to play their instrument.

More than 50 passengers on the flight got moderate or severe diarrhoea. Medical officials suspect the in-flight catering was responsible.

- **develop/ suffer from** arthritis
- **have/ experience** moderate or severe **(attacks of)** diarrhoea

Use different expressions to replace the verb “get”

/mə'lerɪə/

To get cancer is the most frightening experience, and people often need intense counselling to cope with it.

Millions of people get malaria each year in poorer countries, and drugs to treat it are in short supply.

- **to be diagnosed with** cancer
- **catch/ contract** malaria

Use different expressions to replace the verb “get”

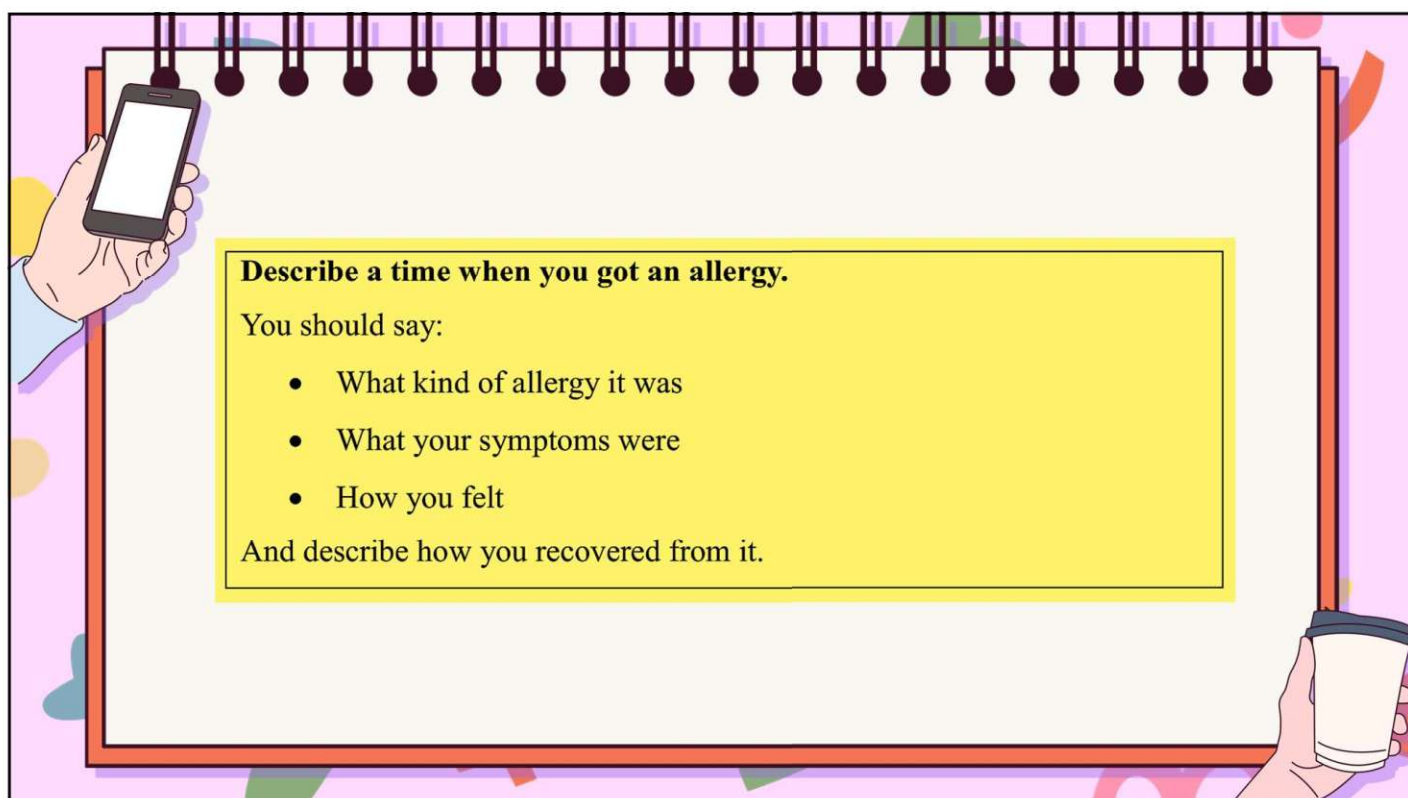

/nju:'məʊniə/

Mr Taylor escaped with bruises, but experts say he was lucky not to have got serious injuries.

Patients often get pneumonia while in hospital. In fact, experts now think hospitals may be the worst place to be if you are sick and weak.

- **have/ suffer from** serious injuries
- **catch/ contract** pneumonia

Allergy?

What is an allergy?

An allergy = the result of the immune system's response to a substance that is harmless to most people.

How do you become allergic?

Antibodies identify that substance as harmful to you, even though it is not.

Substances that can trigger reactions = allergens.

People with a family history of allergies have an increased risk of developing allergic disease.

Types of allergy you experienced?

Is your allergy chronic or not?

Is it seasonal?

Is it year-round?

Is not life-long?

What type of allergy?

Food allergy

Insect allergy

Mold allergy

Pollen allergy

Pet allergy

Drug allergy

Symptoms?

Mild allergic reaction – Symptoms

Itchy, watery eyes
Sneezing
Itchy, runny nose
Feeling tired
Rashes and hives

Severe allergic reaction – Symptoms

Chest tightness
A hard time breathing or swallowing
Dizziness
Swelling of the face, eyes, or tongue
Anaphylaxis

Allergy Symptoms

Trouble breathing,
wheezing or coughing

Hives, rash or itching

Sneezing

Runny nose

Red or watery
eyes

Nausea, vomiting or
diarrhea

Swelling of your face,
mouth, tongue or throat
