

PRONUNCIATION VOWEL SOUNDS

Short vowel
-ɪ-

/ɪ/

Long vowel
-i:-

/i:/

	Sound 1 /i:/	Sound 2 /ɪ/	
	sheep Look out for that sheep.	ship Look out for that ship.	
	leak Stop it leaking!	lick Stop it licking!	
	cheeks What lovely cheeks.	chicks What lovely chicks.	
	peel This peel's got vitamin C in it.	pill This pill's got vitamin C in it.	
	bean Throw out that bean.	bin Throw out that bin.	
	leave He's going to leave.	live He's going to live.	

Tick the words a) or b) that you hear in the sentences.

1 a) sheep	☒	b) ship	☐
2 a) bean	☐	b) bin	☒
3 a) cheeks	☐	b) chicks	☒
4 a) cheap	☒	b) chip	☐
5 a) heel	☒	b) hill	☐
6 a) peel	☐	b) pill	☒

Short vowel
-ʊ-

/ʊ/

Long vowel
-u:-

/u:/

	Sound 1 /b/	Sound 2 /ɔ:/	
	Don Is your name Don?	Dawn Is your name Dawn?	
	cod This cod was in the sea.	cord This cord was in the sea.	
	shot He was shot.	short He was short.	
	pot It's a small pot.	port It's a small port.	
	fox Look for the fox.	forks Look for the forks.	
	spot I don't like these spots.	sport I don't like these sports.	

Tick the words a) or b) that you hear in the sentences.

1 a) spots ☐	b) sports ☒
2 a) pots ☒	b) ports ☐
3 a) cod ☐	b) cord ☒
4 a) shot ☒	b) short ☐
5 a) Rod ☒	b) roared ☐
6 a) what a ☒	b) water ☐

Diphthong/ Long sound -əʊ-

/əʊ/

Sound 1

/ɔ:/

caught

Gino's caught.

nought

It's a nought.

bought

We had a bought picnic.

jaw

It's my jaw.

ball

Give me the ball.

Sound 2

/əʊ/

coat

Gino's coat.

note

It's a note.

boat

We had a boat picnic.

Joe

It's my Joe.

bowl

Give me the bowl.

UNIT 2

Speaking

Lecturer: Quynh Trang, MA.

PRONUNCIATION

PRONUNCIATION Long and Short Vowels

When we pronounce short vowels, our mouth and face muscles are more relaxed, and we say the vowel sounds quickly: *miss, less, book, cup*. With long vowel sounds, our muscles are more tense, and the vowels take slightly longer to say: *phone, fine, like, place*.

short vowel

sit
mad
let
not
quit

long vowel

seat
made
late
note
quite

Spelling is sometimes helpful. Words that end with a silent *-e* (*like, same*) often have long vowel sounds. One-syllable words that end in a vowel (*see, go*) often have long vowel sounds. But words spelled with C-V-C (consonant-vowel-consonant, like *cat, him*) and C-V-C-C (consonant-vowel-consonant-consonant, like *miss, task*) often have short vowel sounds.

E Listen and choose the words you hear. 

1. ☒ a. bit b. bite
2. a. pet ☒ b. Pete
3. a. get ☒ b. gate
4. a. rob ☒ b. robe
5. ☒ a. can b. cane
6. ☒ a. loss b. loose

F Work with a partner. Choose one of the words for each question. Ask your partner the questions. Your partner will choose the best answers.

1. Did you see the (knot / note)?
 - a. No, is the necklace really tangled?
 - b. Yes, I saw it posted on the classroom door.
2. How is the (car / care)?
 - a. It's okay. It needs new tires.
 - b. It's great! All the doctors are friendly.
3. Where is the (plan / plane)?
 - a. I think it is on the desk.
 - b. I think it is landing at the airport.
4. Is this the (cod / code)?
 - a. Yes, I'm going to cook it for dinner.
 - b. Yes, you can use it to log on to the computer.
5. Did you buy a (kit / kite)?
 - a. No, I bought the toy already made.
 - b. Yes, I want to fly it this afternoon.
6. Did she (fall / fail)?
 - a. Yes, and she hurt her knee.
 - b. No, she got an A in the course!
7. Is this (set / seat) available?
 - a. No, someone already bought it.
 - b. No, someone is sitting there.

GRAMMAR FOR SPEAKING

GRAMMAR FOR SPEAKING Present Perfect

We use the present perfect to talk about:

1. Actions or situations that began in the past and continue until now.
*My professor **has done** a lot of work in IT. (She still works in IT.)*
2. Actions or situations that have happened one or more times in the past and relate to the present. The exact time is not stated or important.
*Leona **has taken** several courses in computer programming.*
*We **have never gone** to a technology conference, so we want to go to one.*

We form the present perfect with **have/has** plus the past participle of a verb. We often use contractions with the present perfect.

*I've **learned** a lot about artificial intelligence.*
*My classmate's **built** his own website, but he **hasn't published** it yet.*
***Have** you **used** a robot?*

A Listen to the sentences and write the words you hear. 🔊

1. I 've called customer service three times today.
2. This has been my favorite class this semester.
3. Engineers haven't solved all the problems with self-driving cars.
4. Voice recognition software has gotten quite good in recent years.
5. My brother hasn't learned any other languages.

GRAMMAR FOR SPEAKING Signal Words with the Present Perfect

29

Signal words and phrases with the present perfect give extra information about when something happened.

For signals how long something has been true.

We **have known** about the problem **for** over a year.

Since signals when a situation began.

I've **had** my phone **since** last year.

Here are other signal words and phrases that are commonly used with the present perfect.

already	ever	so far	(not) yet
always	never	up to now	

We're a new IT company, but we **have already grown** a lot.

We **have earned** profits totaling \$71,000 **so far** this year. (We might still earn more.)

Have you **ever eaten** at that restaurant?

C Write the present perfect of the words in parentheses and choose the correct signal words.

1. Richard has/ 's been (be) a videogame designer **for / since** 2019.
2. I have/ve known (know) him **for / since** almost ten years.
3. Has Elena **ever / yet** visited (visit) her cousins in Hungary?
4. No, she has/ 's **never / so far** been (be) there, unfortunately.
5. I have/ve **already / up to now** finished (finish) the homework for next Monday.

UNIT 2

Speaking

Technology today & tomorrow

Lecturer: Quynh Trang, MA.

Talking about
technology

Do you use any gadgets every day?

- ☐ every day ~ daily/ on a daily basis/ each and every day
- What gadget/ device?
- How long have you used it? How many hours a day do you use it?
- Its uses? (use it to + V; use it for + N/NP; assist me in V-ing; help me + V; enable me to + V; etc.)
- Change? (reduce/limit the use of that gadget/ device or not?)

Do you use the Internet?

- How often do you use it?
- What do you use to access the Internet? Your most frequently used apps?
- Uses? (use it to + V; use it for + N/NP; assist me in V-ing; help me + V; enable me to + V; etc.)
- Change? (reduce or increase your Internet use)

Do you have a computer?

- How long have you had it? How often do you use it?
- Uses? (use it to + V; use it for + N/NP; assist me in V-ing; help me + V; enable me to + V; etc.)
- Comparison between using a computer and using a phone? (By comparison with smt, S + V; Compared with/ to smt, S + V)

Match a word from box A with a word from box B, and use the compound nouns to complete the sentences.

A automatic cyber labour remote
 silicon wireless

B chip connection control pilot
 saving space

1. I can access the Internet from anywhere in my house because my laptop has a
2. The invention of the made watching television an even more passive experience.
3. In my opinion, the dishwasher is one of the greatest devices.

1. wireless connection
2. remote control
3. labour-saving

Name some entertainment apps that you know

- Social media and video apps (Facebook; Tiktok; Youtube; etc.)
- Music and streaming apps (Netflix; Vieron; FPT Play; Spotify; etc.)
- Gaming apps (LOL; Plants vs. Zombies; Candy Crush; etc.)

Match a word from box A with a word from box B, and use the compound nouns to complete the sentences.

A automatic cyber labour remote
 silicon wireless

B chip connection control pilot
 saving space

1. People often talk about emails and text messages being lost in as if it were a real place.
2. Even flying a plane has been automated now. The is used for most of the flight.
3. The invention of the meant that computers could be much smaller.

1. cyber space
2. automatic pilot
3. silicon chip

How do people use the Internet and devices like cellphones and computers in daily lives?

- Adults vs. Younger people?: Different uses? How often?
- Possible dangers to be aware of? (risk their personal health through excessive use; endanger their privacy; etc.)

Correct the mistakes in the text. Use ONE WORD ONLY.
The hyphenated word counts as one word.

Today's (1) advance technology has brought many benefits. For example, nowadays we have many (2) small tools that can save time in the home, and if you have access (3) with a computer and a telephone (4) connect then you can work almost anywhere you choose. What is more, modern software (5) programmes are so user-friendly that you don't even need a great deal of computer knowledge to be able to (6) play them.

1. advanced/ modern/ cutting-edge
2. gadgets/ devices/ appliances
3. to
4. connection
5. programs
6. use

Correct the mistakes in the text. Use ONE WORD ONLY.
The hyphenated word counts as one word.

There are some disadvantages to the (1) technology era. For example, people today want to have the (2) last technology but, as new technology dates very quickly, an increasing amount of computer hardware is being dumped. This adds to our already serious pollution problems. Furthermore, (3) computerise has led to fewer jobs and less human contact as many everyday transactions are now done (4) with computer rather than (5) manual.

1. technological/ digital
2. latest
3. computerisation
4. by
5. manually

Do you think computers will be capable of thinking in the same way as human beings do?

- ☐ Computers will be capable of thinking in the same way as human beings do ~ computers have the ability to/ can + think like humans// computers possess human-like thinking abilities

Computers do many things better than our brains can. But one area where brains tend to outperform computers is in tasks such as perception, decision making, and context recognition. A reason for this is that our brains process data both in sequence and simultaneously, and they store memories in synapses — connections between the brain's nerve cells — all over the system. A conventional computer processes data only in sequence and stores memory in a separate unit.

Devices mimicking the brain's nerve cells have been developed. But until now, a crucial piece of the puzzle — “efficient” synapses, or synapses that don't require too much energy — has been missing.

Source: National Institute of Standards and Technology, U.S. Department of Commerce

To make computers learn, we use software that simulates neurons connected in networks like in a brain. As we still don't fully understand how brains work, computers are unlikely to be as good at learning as humans for hundreds of years.

LONG TURN

Describe a useful entertainment or lifestyle app on a computer, smartphone, or other device.

You should say:

- What it is
- Who invented it
- How it works

And explain why it is useful.

What it is

- ☐ What are the common apps? What is the name and the main purpose of this app?
- ☐ What are the key features that make it different from similar apps?
- ☐ How has the app evolved over time in terms of design or functionality?
- ☐ In what ways does the app integrate with other devices or services?

Who invented it

- ☐ Who is the developer or company behind the app?
- ☐ What motivated them to create this app? Did they face any difficulty initially?
- ☐ How has the company behind the app grown since its inception?

How it works

- ☐ What is the user interface like (easy to navigate or not)? Can it personalize and better user experiences?
- ☐ What are the main steps a user take to use the app?
- ☐ Are there differences between free and premium versions?

And explain why it is useful.

- ☐ How does the app enhance daily routines or leisure time for users?
- ☐ Does it contribute to users' mental well-being or productivity, and how?
- ☐ Does it offer any social benefits?
