Introduction

*In the age of **tech obsession** like today, a smartphone **teeming with** a variety of useful apps is so crucial that those without it are immediately considered **behind the time**. I also have one for my own and the app that I find among the most beneficial for me is **Youtube/.....***

The developments in technology have been providing a lot of **smart applications** for users, which allows them to **access entertainment** and also to **work more effectively**. **One** of those apps that youngsters have been using more and more in their tablets and mobile phones is **definitely TikTok/...**

What it is:

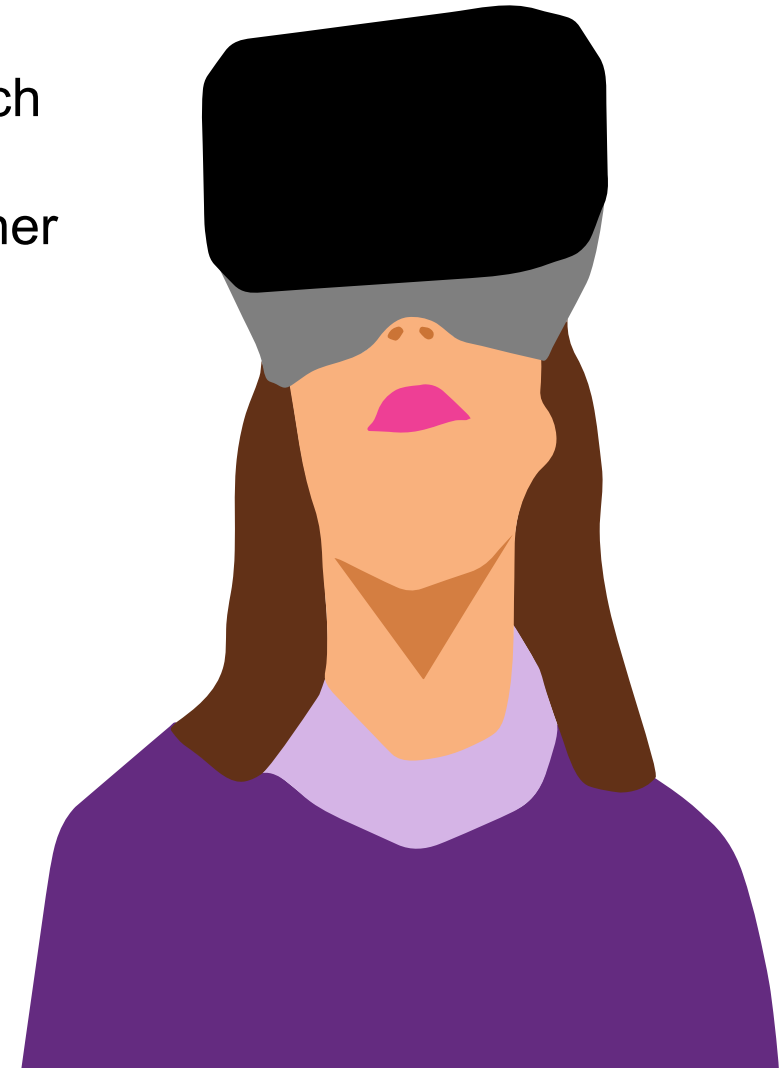

YouTube is a video-sharing platform where users can watch, upload, and share videos on almost any topic imaginable—such as music, education, cooking, fitness, comedy, and more. It works on smartphones, tablets, computers, smart TVs, and other internet-connected devices.

TikTok is a short-video sharing app where users can create, watch, and interact with videos that are usually between 15 seconds to 3 minutes long. It covers a wide range of content—music, dance, comedy, education, fashion, fitness, cooking, and more.

Instagram is a social media app that allows users to share photos, videos, and stories with their followers. It is used for entertainment, self-expression, staying connected with others, and even for business and lifestyle inspiration.

Who invented it:

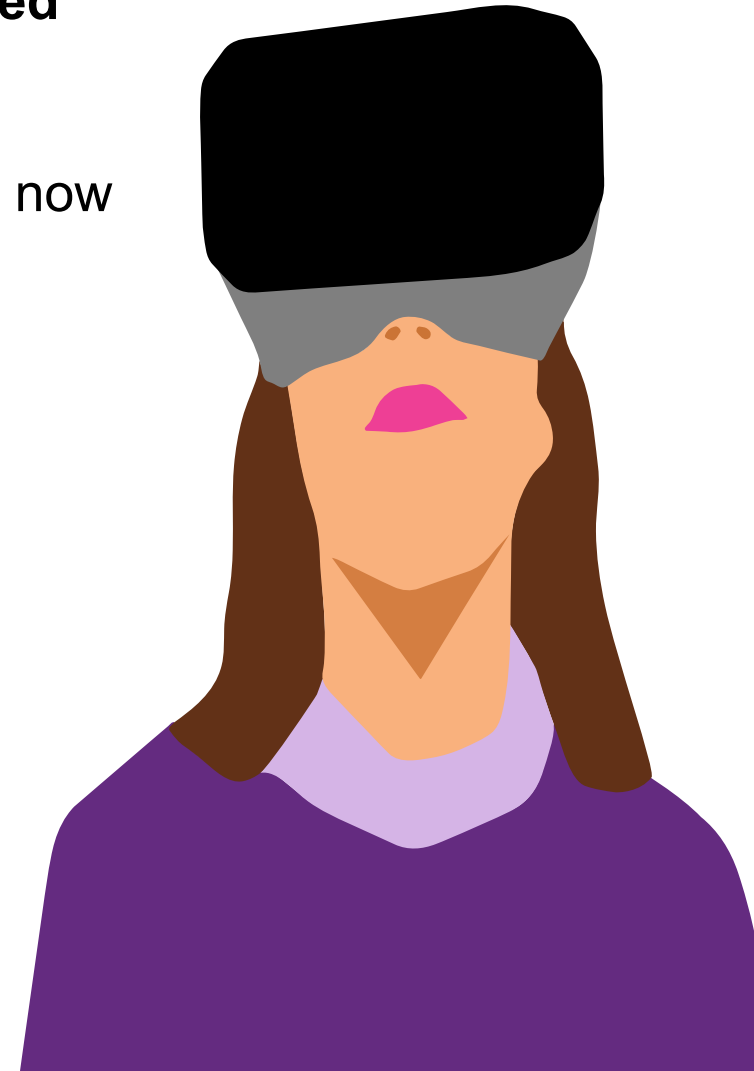

YouTube was created by **Steve Chen, Chad Hurley, and Jawed Karim**, three former employees of PayPal. They launched the platform in **2005**, and it quickly became one of the most visited websites in the world. In 2006, it was bought by **Google**, which now owns and operates it.

TikTok was developed by a Chinese tech company called **ByteDance**, and it was launched internationally in **2016**. It became even more popular after merging with another short-video app called **Musical.ly** in 2018.

Instagram was created by **Kevin Systrom** and **Mike Krieger**. It was launched in **2010**, and later acquired by **Facebook (now Meta)** in 2012.

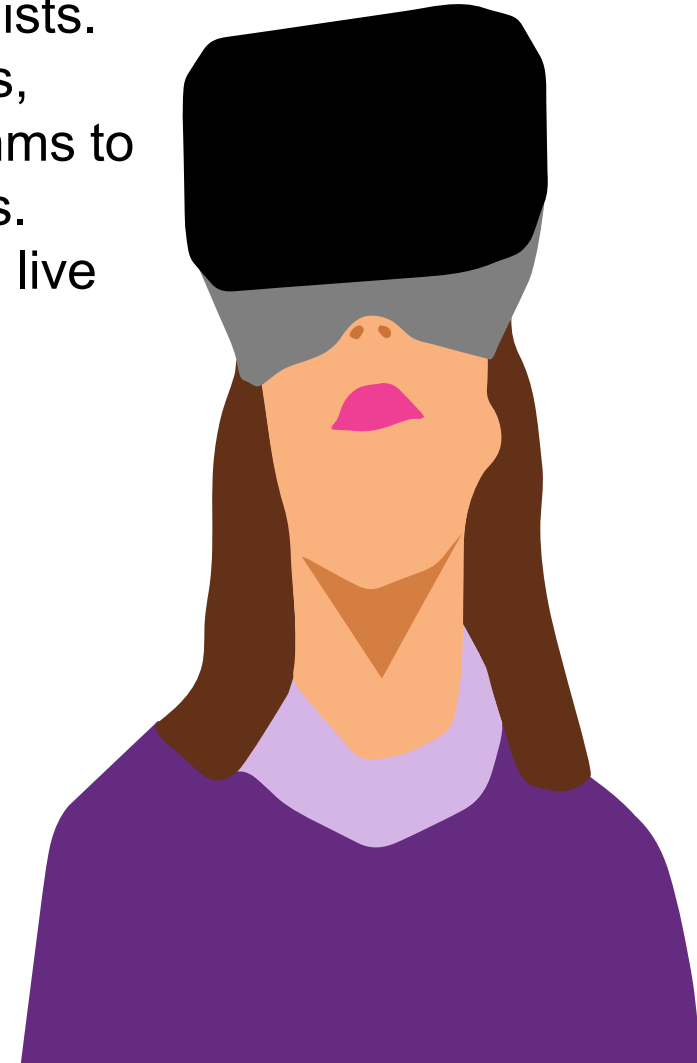

How it works:

YouTube allows users to sign in with a Google account, search for videos, subscribe to channels, leave comments, and create playlists. Content creators can upload videos and earn money through ads, sponsorships, and memberships. The platform also uses algorithms to recommend videos based on a user's watch history and interests. In addition to entertainment, YouTube offers educational content, live streams, news coverage, and even tutorials for hobbies and professional skills.

On **TikTok**, Users download the app and can start watching videos immediately. They can also create their own videos using the app's built-in camera, filters, music tracks, and editing tools. **TikTok's** main feature is the "For You" page, where a smart it shows videos based on your interests and behavior—such as what you like, share, or comment on. People can follow creators, join trends, use popular sounds or hashtags, and take part in challenges.

How it works:

Instagram allows users create an account and can upload photos or videos, add captions, and use hashtags to reach a wider audience.

Features include:

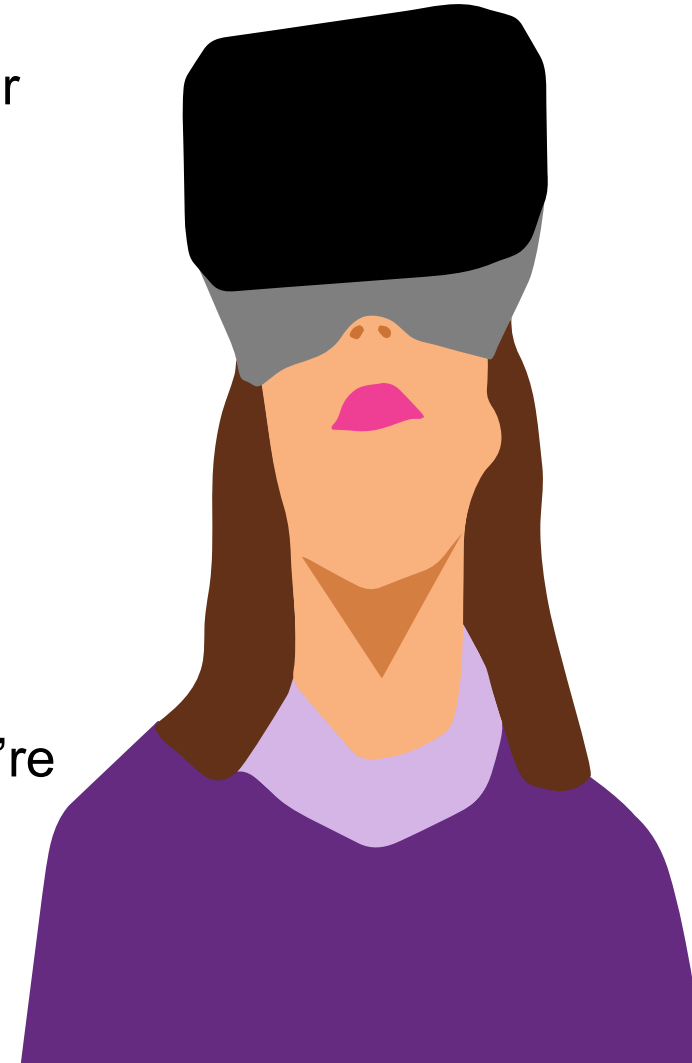

Stories – short-lived posts that disappear after 24 hours

Reels – short, engaging videos similar to TikTok

Direct Messaging – for private conversations

Explore Page – to discover content based on your interests

Instagram uses algorithms */ˈælgəriðəm/* to show users content they're likely to enjoy, based on what they like, follow, or interact with.

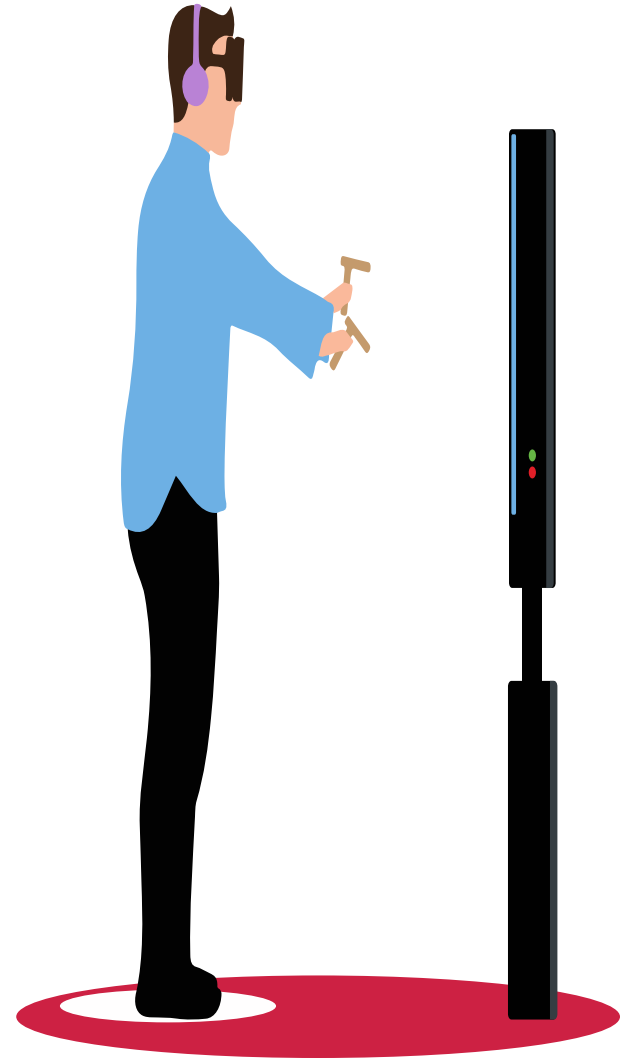

Why it is useful

YouTube is extremely useful because it combines learning and entertainment in one place. Whether someone wants to relax by watching funny videos, learn how to cook a new dish, or follow a guided workout, YouTube has content for everyone. It's also a platform where anyone can become a creator, share their voice, and even build a career.

Its wide variety of content, ease of access, and personalization make it one of the most valuable and versatile apps in everyday life.

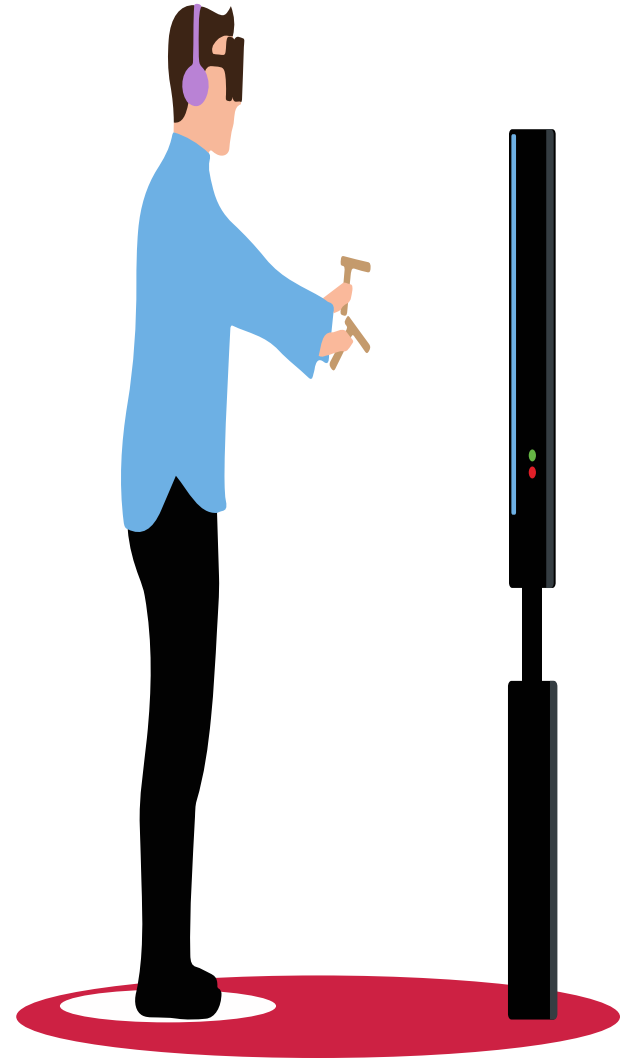

Why it is useful

TikTok is useful because it combines entertainment, creativity, and social connection in a fast, engaging way. It allows users to express themselves creatively and discover content that suits their personal interests. For many, it's a great source of fun, inspiration, and even learning—like life hacks, language tips, or quick tutorials.

In addition, TikTok gives everyday users a chance to go viral and gain followers, making it a platform where anyone can become a creator or influencer. Its easy-to-use features and endless variety of content make it one of the most popular lifestyle apps today.

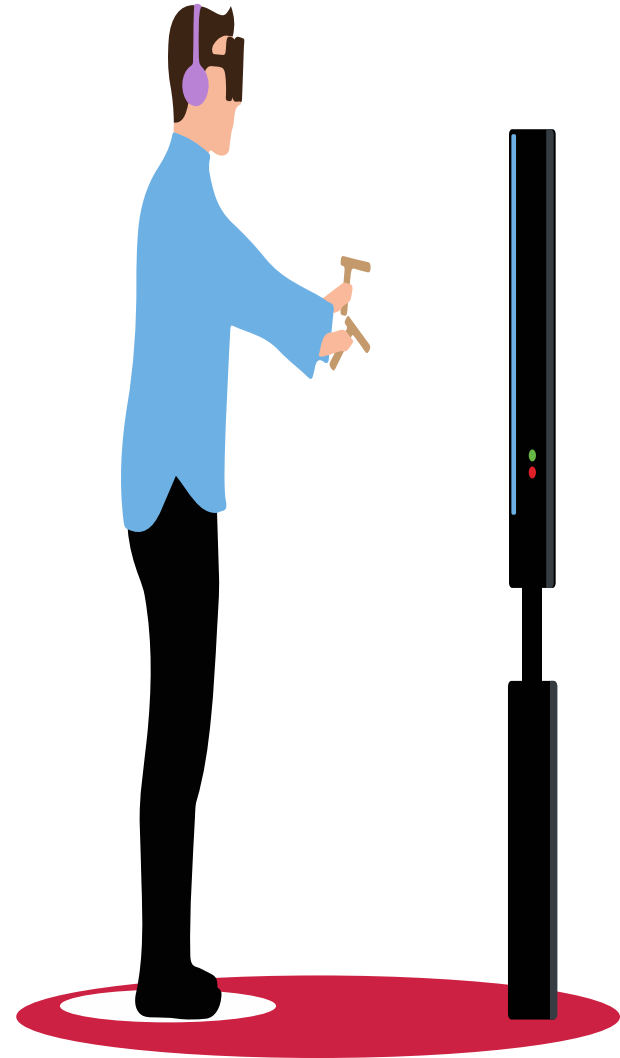

Why it is useful

Instagram is useful because it combines entertainment, creativity, and connection in one platform. People use it to follow friends, celebrities, influencers, and brands. It's a great source of lifestyle ideas—such as fashion trends, travel spots, healthy recipes, and workout routines.

For content creators and small businesses, Instagram is also a powerful tool for reaching audiences, building a brand, and selling products or services.

Conclusion

In short, is more than just a photo-sharing app—it's a lifestyle platform that keeps people inspired, informed, and entertained every day.

In short, is a convenient and enjoyable app that fits into both entertainment and lifestyle needs, making it a favorite for people of all ages.
