

SPEAKING

UNIT 6: KNOWLEDGE IS POWER

Lecturer: Quynh Trang, MA.

PRONUNCIATION CONSONANT SOUNDS

Consonants /p/ and /b/

/ p /

Sound 1

/p/

pin

It's a useful pin.

pen

Pen, please!

pear

Look at the yellow pear.

cap

It's an old cap.

pup

What a lively pup!

Poppy

Do you like Poppy?

Sound 2

/b/

bin

It's a useful bin.

Ben

Ben, please!

bear

Look at the yellow bear.

cab

It's an old cab.

pub

What a lively pub!

Bobby

Do you like Bobby?

Consonants /n/ and /ŋ/

/ n /

Sound 1

/n/

win

What a win!

thin

Why this thin?

ban

Ban the book.

ran

They ran for an hour.

run

She has never
run before.

Ron

Is it Ron?

Sound 2

/ŋ/

wing

What a wing!

thing

Why this thing?

bang

Bang the book.

rang

They rang for an hour.

rung

She has never
rung before.

wrong

Is it wrong?

Consonants /m/ and /n/

/ m /

Sound 1
/m/

mile

The mile is very old.

mine

This is mine.

mummy

He loves mummy.

comb

I want a comb.

name

He's proud of this name.

Sound 2
/n/

Nile

The Nile is very old.

nine

This is nine.

money

He loves money.

cone

I want a cone.

mane

He's proud of this mane.

PRONUNCIATION

PRONUNCIATION Silent Consonants

 Consonants are usually pronounced, but some words have silent consonants. Often, silent consonants are part of a sequence, or cluster, of consonants.

The *b* in *mb* and *bt* is always silent at the end of a word.

thumb /θʌm/

doubt /daʊt/

The *k* in *kn* is always silent at the beginning of a word.

know /noʊ/

knife /naɪf/

The *w* in *wr* is always silent at the beginning of a word.

write /raɪt/

wrong /rɔŋ/

E Complete the words with the correct two-letter clusters from the Pronunciation box. Then practice saying the words.

1. climb

5. knock

9. knot

2. knee

6. wrote

10. lamb

3. wrist

7. comb

11. knew

4. wrap

8. thumb

12. debt

F Work with a partner. Choose situation 1, 2, or 3. Underline all the silent consonants. Then decide who should be person A and person B and make up a conversation.

1. A: You're a climber. You hurt your wrist and thumb. Tell your doctor what happened.
B: You're a doctor. A patient visits you. Ask questions and give the patient some advice.
2. A: You're a shopper at a store. You don't know where the combs are. Ask for help.
B: You work at a store. A customer can't find something. Help the customer.
3. A: You're a student. You took a test but got many items wrong. Ask a teacher for help.
B: You're a teacher. A student got many answers wrong on a test. Advise the student.

GRAMMAR FOR SPEAKING

GRAMMAR FOR SPEAKING Comparative and Superlative Adjectives

We use comparative and superlative adjectives to compare people or things.

	Adjective	Comparative (+ <i>than</i>)	Superlative
one syllable	hard	harder	the hardest
two syllables ending in -y	funny easy	funnier easier	the funniest the easiest
two or more syllables	successful common	more/less successful more/less common	the most/least successful the most/least common
two-syllables with two forms	friendly quiet	friendlier/more friendly quieter/more quiet	the friendliest/the most friendly the quietest/the most quiet

The library is a **quieter** place to study **than** my room.
Math is **the hardest** of my classes.

With both comparatives and superlatives, the second part of the comparison can be a noun phrase.

This week's test was **more difficult than** the one that we had last week.

This week's test was probably **the hardest** one that we've had all year.

We can make comparative adjectives stronger by using a lot, even, far, and much. We can use a bit or a little to make a comparative adjective less strong.

Today's test was **much harder than** our last one. I hope our next one is **a bit easier.**

A Read the sentences. Check the correct ones. Correct the ones with errors.

1. ☒ History textbooks can be much longer than textbooks used for other classes.
2. ☒ The University of Bologna in northern Italy is one of the oldest in the world.
3. ☐ Half the students failed the test because they thought it would be ~~more easy~~ **easier**.
4. ☒ College students often study in the library because it is quieter than other places.
5. ☐ Students stopped attending the class as it was far more boring they had expected. **+ than**
6. ☒ Many people think Seoul National University is the best one in South Korea.
7. ☐ Courses at Canadian colleges are often ~~cheap~~ **cheaper** and ~~short~~ **shorter** than courses at universities.
8. ☒ Einstein and Feynman are two of the most famous and important scientists in history.

SPEAKING PRACTICE

D BRAINSTORM Write the benefits of each method of education in the chart.

Advantages of Different Methods of Education

Taking an in-person class

- Direct, immediate feedback
- Formal, accredited qualifications
- Collaborative learning activities
- Enhanced teamwork skills
- Resourceful campus facilities
- Minimized home/ work distractions

Studying with a tutor/private instructor

- Adaptable schedule
- Targeted explanations
- Individualized, student-centered approach
- Tailored learning goals
- Undivided attention given by the tutor/ instructor
- Supportive space for questions and answers

Taking an online course

- Wide-ranging courses
- Location-independent learning
- Reduced expenses for travel, accommodation, and materials
- Flexible timing; work-life integration
- Multimedia learning content
- Repeatable lectures

Teaching yourself

- Self-paced schedule
- Flexible, self-directed learning activities
- Self-tailored curriculum
- Opportunities to develop self-discipline and time management skills
- Problem-solving practice
- Exploratory freedom

**When you need to take a test,
how will you prepare for it?**

My typical **p...** for tests involves **r...** my class notes and textbooks well in **a...** as this strategy ensures a **s... u...** of the material. I also practice with several exam papers to **f...** myself with the question **f...** and improve my time **m...** skills, in **a...** to the **s...** of exam conditions by timing myself while answering questions. This structured **a...** has consistently **b...** my **a...** success, resulting in better performance in my **a...**

My typical **preparation** for tests involves **reviewing/ revising** my class notes and textbooks well in **advance** as this strategy ensures a **solid understanding** of the material. I also practice with several exam papers to **familiarize** myself with the question **format** and improve my time **management** skills, in **addition** to the **simulation** of exam conditions by timing myself while

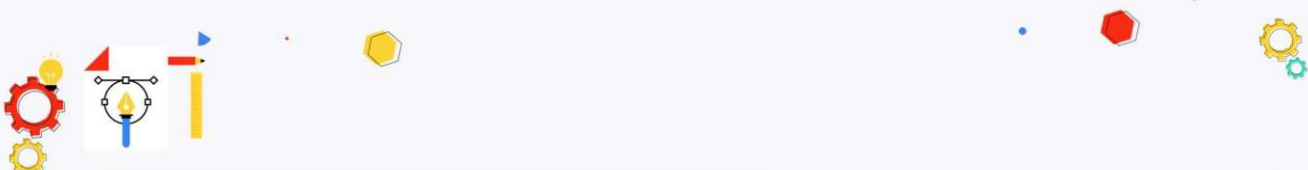

- answering questions. This structured **approach** has consistently **boosted** my **academic** success, resulting in better performance in my **assessments**.

When I prepare for tests, I avoid **c...**, instead, I plan several **s...**, focused sessions so my brain has time to **b...** new physical **c....** I begin by identifying the most important information, using **h...** and diagrams to **o...** the material clearly, since the brain can only **p...** a **l...** amount at once. To boost **r...** of knowledge, I **r...** the main ideas aloud in my own **w...** and sometimes sketch simple visuals, which **a...** the visual part of the brain and **s...** the new connections. I also try to stay genuinely **i...** in the subject, reminding myself that I will **n...** this knowledge in the future. By combining these four **k...** points for **e...** study, I can **t...** information into **l...** memory, **e...** my retention and confidence during exams.

When I prepare for tests, I avoid **cramming**, instead, I plan several **short**, focused sessions so my brain has time to **build** new physical **connections**. I begin by identifying the most important information, using **headings** and diagrams to **organize** the material clearly, since the brain can only **process** a **limited** amount at once. To boost **recall** of knowledge, I **recite** the main ideas aloud in my own **words** and sometimes sketch simple visuals, which **activates** the visual part of the brain and **strengthens** the new connections. I also try to stay genuinely **interested** in the subject, reminding myself that I will **need** this knowledge in the future. By combining these four **key** points for **effective** study, I can **transfer** information into **long-term** memory, **enhancing** my retention and confidence during exams.

**SPEAKING:
LONG TURN**

Describe a subject that you studied and liked.

You should say

- What it was
- Where you studied it
- How you studied it

And explain why you liked it.
