

ANIMAL BEHAVIOR 9

A close-up photograph of two small, translucent orange frogs with large, prominent eyes. They are perched on a dark green, wet leaf. The frog in the foreground has its mouth wide open, as if calling or croaking. Water droplets are visible on the leaf and in the air around the frogs. The background is a soft, out-of-focus green.

Small frogs use leaves to hide from the rain in Bogor, Indonesia.

IN THIS UNIT, YOU WILL:

- Read an interview with a famous animal trainer
- Watch a video about monkeys that use tools
- Read an article about how monkeys have feelings
- Write about two different animals

THINK AND DISCUSS:

1. Look at the photo above. What type of animals are these? What are they doing?
2. What can we do that most animals cannot do? What can some animals do that we cannot do?

EXPLORE THE THEME

Read the information below and answer the questions.

1. In what ways are humans and chimpanzees similar?
 2. How do dogs help people?
 3. What other animals are close to humans? In what ways?
-

Close to Us

In terms of biology, non-human primates—such as great apes and monkeys—are the closest animals to human beings. Our nearest relative is the chimpanzee. According to scientists, humans and chimpanzees share 96 percent of their DNA. Chimpanzees and humans also behave in a few similar ways, such as living in social groups and using tools.

However, non-human primates are wild animals which rarely live near people. Dogs, on the other hand, have lived and worked with humans for over 10,000 years. Many dogs have jobs such as guarding¹ homes, doing police work, and helping people with disabilities. Dogs cannot think like humans or use tools like some primates, but they are an important part of many people's lives. In some ways, they are "closer" to us than our nearest animal relatives.

¹ When you **guard** something, you protect it from harm.

The director of the Lwiro Primates Rehabilitation Center, Democratic Republic of Congo, welcomes two baby chimps.

Reading 1

PREPARING TO READ

- **A BUILD VOCABULARY** The words and phrases in **blue** are used in the reading passage. Read the paragraph. Then write the correct form of each word or phrase next to its definition.

If you want a dog to be a good **pet**, send it to school. At dog school, **trainers** teach dogs how to behave at home and how to respond to basic commands. Dog training is a relatively new **profession**, but the idea has been around for more than 2,000 years. Around 120 B.C., a Roman farmer, Marcus Varro, wrote about the best **approaches** to training farm dogs. Trainers during this time had already **worked out** that dogs should receive different training for different farm jobs.

1. _____: (n) a type of job that requires special training, such as a college degree
2. _____: (n) a person who teaches certain skills
3. _____: (n) a way to deal with something
4. _____: (v) to solve or understand something by thinking about it
5. _____: (n) an animal that people keep at home

- **B BUILD VOCABULARY** The words in **blue** are used in the reading passage. Match each word to the correct definition. Use a dictionary to help you.

- | | |
|---------------------------|---|
| 1. ____ appreciate | a. (n) someone who legally has something, e.g., a house |
| 2. ____ companion | b. (adj) being unable to understand something |
| 3. ____ confused | c. (adj) strong |
| 4. ____ owner | d. (v) to like something and think it is valuable |
| 5. ____ powerful | e. (n) a friend |

- **C USE VOCABULARY** Discuss these questions with a partner.

1. What skills do you think a professional dog **trainer** needs?
2. What qualities do you think a good **pet owner** needs?

- **D SKIM** Skim the interview questions in the reading passage. Check (✓) the topic(s) that the interview covers. Then check your answers as you read the passage.

- ☐ 1. some reasons that people choose to have particular types of dogs
- ☐ 2. how and why Millan became a dog trainer
- ☐ 3. some things that dogs can teach us
- ☐ 4. some differences between human and dog behavior

Reading Skill
in Unit 1.

The Animal Trainer

Animal trainer Cesar Millan helps dogs and their owners.

- A  Mexican-born Cesar Millan is one of the world's best-known animal **trainers**. On his TV shows, Millan helps dogs—and their **owners**—deal with their problems. He helps angry and scared dogs become good **companions**. He helps **confused** owners learn how to treat¹ their dogs better, so they are happy. Below, he gives some of his insights into the minds of dogs and their owners.

What is the biggest mistake we make with dogs?

- B We humanize dogs. We hold conversations with them as if they were people ... A dog doesn't know it lives in Beverly Hills or how much we spend on it.

Why do people like certain kinds of dogs?

- C It's about what they want from another human but can't get, so they get it from a dog. So a person gets a pit bull as a **pet** because ... it represents power, strength—like driving a Ferrari.

And a small poodle?

- D Because it's ... decorative.²

So, people get dogs that are like them?

- E I walk into a home, and I don't have to hear much. I see the dog, and I know who you are. It's a mirror.

¹ The way you treat something is how you deal with or behave toward it.

² Something that is decorative looks pretty or attractive.

What is your **approach** to helping owners with their dog problems?

- F If you don't tell a dog what to do, it will tell you what to do. My clients³ are **powerful**, they have Harvard degrees, they run [big corporations], but they can't control a dog. You don't ask a dog if it would like to go for a walk. You put on the leash⁴ and go.

Is there any creature you can't rehabilitate?⁵

- G My father. I want him to tell my mother, "I **appreciate** you. Thank you. I love you." But he can't, not in the machismo⁶ culture of Mexico.

Can't you take your father for a walk and **work out** the issues?

- H No. He'd just run away.

How did your parents feel about your choice of **profession**?

- I They wanted me to become a professional, [like a] doctor [or] lawyer.

How does your father feel now that you've made it?⁷

- J He still can't understand why Americans pay me for walking their dogs.

What are the lessons we learn from dogs?

- K To live in the moment. Also, honesty. They will never stab you in the back or lie to you.

Do dogs think and feel?

- L They feel—they are instinctual.⁸ They don't think.

So, which animal behaves better—humans or dogs?

- M Oh, dogs.

³ A client receives a professional service in return for payment.

⁴ A leash is a long, thin piece of material used to keep a dog under control.

⁵ To rehabilitate someone means to help that person live a normal life again, e.g., following an illness.

⁶ Machismo refers to a man's behavior when he is very proud of his masculinity.

⁷ If you have made it, you have become successful.

⁸ Instinctual actions are based on feelings, rather than opinions or ideas.

Millan helps a dog learn
to behave better.

UNDERSTANDING THE READING

- **A UNDERSTAND MAIN IDEAS** Check (✓) the statements that you think Cesar Millan would agree with.

- ☐ 1. Dog owners should treat their dogs like people.
- ☐ 2. A dog trainer has to work with both dogs and their owners.
- ☐ 3. Humans are easier to teach than dogs.
- ☐ 4. You can tell a lot about a person by meeting their dog.

- **B UNDERSTAND DETAILS** Choose the best options to complete the sentences based on Millan's comments in the reading passage.

- 1. Many owners make the mistake of **treating dogs like people** / **allowing dogs in their bedrooms**.
- 2. People sometimes like certain dogs based on what they **like about** / **want from** other people.
- 3. People choose dogs that are **different from** / **similar to** them.
- 4. Some clients have problems with their dogs because they aren't **firm** / **patient** enough.
- 5. Two lessons we can learn from dogs are **honesty** / **confidence** and living in the moment.

- **C UNDERSTAND IDIOMS** What do you think the idiomatic expression "stab you in the back" in the interview means? Choose the best option.

- a. lie to or deceive someone.
- b. hurt someone physically

CRITICAL THINKING Making Inferences

When you make an inference, you understand something that a writer does not say directly. When you make an inference about a person, you guess information about that person based on the things they have said or done.

- **E MAKE INFERENCES** Read three possible inferences based on what Millan says in Exercise D. Match each inference to one of the statements (1–3) in Exercise D.

- a. _____ They don't really like his job.
- b. _____ In some ways, Millan thinks they are better than humans.
- c. _____ Intelligent people should be able to manage a dog.

Critical Thinking

DEVELOPING READING SKILLS

READING SKILL Recognizing Noun Clauses

Recognizing noun clauses can help you understand more about an author's ideas. If you do not know what a noun clause is, you might be confused because it can look a lot like a statement or a question. However, a noun clause acts like a noun in a sentence.

A noun clause contains a subject and a verb.

subject + verb

A dog doesn't know how much we spend on it.

main clause

noun clause

To identify noun clauses:

- Look for a subordinating conjunction at the start of the clause—usually *that* or a *wh-* word (*who, what, where, why, when, and how*).
- Replace the noun clause with a noun or pronoun. If the sentence still makes sense, then the clause is a noun clause.

Do you know who Cesar Millan is? (Do you know him?)

I don't know how old the dog is. (I don't know its age.)

I believe that she is right. (I believe her.)

What Millan says makes sense to me. (It makes sense to me.)

- **A RECOGNIZE NOUN CLAUSES** Match the noun clauses (a–c) to each sentence beginning (1–3). Then scan the interview to check your answers.

1. A dog doesn't know ____ a. who you are.
2. I see the dog, and I know ____ b. that it lives in Beverly Hills.
3. [My father] still can't understand ____ c. why Americans pay me for walking their dogs.

- **B RECOGNIZE NOUN CLAUSES** Read the paragraph below. Find and underline four more noun clauses. Then note answers to the questions and discuss them with a partner.

Which do you like better: dogs or cats? Does your answer say anything about who you are?

Scientist Sam Gosling thought he knew the answer, but decided to find out. In his study, Gosling first found out how people classify themselves. In other words, he asked people if they were dog people, cat people, neither, or both. Then he gave the same people a personality test. The results showed what Gosling expected: that dog people and cat people are different. For example, Gosling learned that dog people are more outgoing than cat people. He also learned that cat people are more imaginative.

1. What did Gosling want to learn in his study? _____
2. What did Gosling find out first? _____
3. What was one result of Gosling's study? _____

A macaque uses a stone tool to open oysters.

Special Macaques

The island of Piak Nam Yai lies off the west coast of Thailand. It is home to a species of monkey called macaques.

- A PREVIEW** Look at the photo and read the information above. In what ways do you think these macaques are special? Discuss your answer with a partner.

Critical Thinking

- B MAIN IDEAS** Watch the video. What is special about the macaques on Piak Nam Yai? Choose the best option.

- a. They are better at using tools than gorillas.
- b. They live on an island that has oysters.
- c. They are the only macaques that use tools to open oysters.

- C DETAILS** Watch the video again. Choose the correct options to complete the sentences.

- 1. The macaques on the island were trapped by **the rising sea** / **a broken bridge**.
- 2. The macaques **are born with** / **learned** the skill of opening oysters.
- 3. The video describes the macaques' brains as **simple** / **complex**.

- D EVALUATE** The video describes the macaques as smart. Do you agree? What other examples of animals using tools do you know? Share your ideas with a partner.

Critical Thinking

Reading 2

PREPARING TO READ

- **A BUILD VOCABULARY** The words and phrases in blue are used in the reading passage. Complete the sentences with the correct words and phrases.

If you **continue** to do something, you keep doing it without stopping.
When people **cooperate**, they work together to achieve the same goal.
If you **exchange** something, you give it to someone and get something in return.
If you **expect** something, you think that it will happen.
Someone who is **fair** treats everyone the same way.
Your **response** to something is what you do, think, or feel about it.
A **relationship** is a connection, such as a friendship, between two people.
A **reward** is something you get for doing a good job.
If you **take part** in an activity, you join other people in doing it.
Being **willing** to help means you are happy to help someone.

1. The law can't treat people differently. It must be _____ to everyone.
2. Some animals may not be _____ to share their food. Other animals, such as ground squirrels, _____ with each other to find and store food.
3. This food is making my dog sick, so I'm going to go back to the store and _____ it for a different kind.
4. Scientists were surprised to see macaques use tools. They didn't _____ that.
5. If an owner gives a dog a(n) _____ for good behavior, it is likely to _____ behaving well. Over time, the dog will develop a strong _____ with the owner.
6. Some animals don't _____ in hunting for food until they are fully grown.
7. Most dogs have the same _____ to their owners coming home: They get very excited.

- **B USE VOCABULARY** Discuss these questions with a partner. Can you think of a time when someone treated you in a way that was not **fair**? What was your **response**?

Critical Thinking

- **C PREDICT** Read the title and the headings of the reading passage. What do you think the passage is about? Choose the best option. Then check your answer as you read.

- a. how monkeys are helping humans
- b. recent studies of monkey behavior
- c. why monkeys are intelligent

Do Monkeys Have Feelings?

Capuchin
monkeys in
Costa Rica

- A**  We already know that monkeys share a lot of similarities with humans. However, two recent studies show that monkeys may be even more similar to us than we thought.

STUDY 1: Monkeys Show a Sense of Fairness

- B** Most humans **expect** to receive **fair** treatment. Scientists now believe that brown capuchin monkeys may feel the same way.
- C** Scientists study capuchin monkeys because they have strong social bonds. In other words, capuchins have close **relationships** with each other. They also

cooperate. For example, they all **take part** in activities to collect food, such as finding fruit trees.

- D** Researcher Sarah Brosnan did a study to find out if capuchins cared about fairness. She put two female monkeys together—Winter and Lance. She trained each monkey to give her a small token.¹ “That may sound simple, but not very many species are **willing** to [give things away],” says Brosnan. When Lance **exchanged** a token with Brosnan, she got a piece of cucumber as a **reward**. When Winter gave a token, she sometimes got a piece of cucumber, but sometimes got a better reward—a grape.

¹A token is a small item that can be exchanged for something of value.

E Brosnan said the capuchins' **response** to unfair rewards was surprising. When Lance saw Winter get a better reward—the grape—she became unhappy. She did not want to **continue** the test and threw the cucumber at Brosnan.

F Studies show that humans and capuchins share other ideas about fairness, too. For example, researchers gave one capuchin a cucumber in exchange for three tokens. They gave another capuchin a grape for doing nothing at all. The first capuchin got angry. Researchers learned that capuchins do not like putting in more effort and getting less reward.

G This research suggests that our expectation of fair treatment is likely natural. In other words, it is not something we learn at school or home.

STUDY 2: “Love Drug” Results in Kinder Monkeys

H Scientists studying monkeys found some surprising results using a chemical called

oxytocin. Oxytocin is produced by humans and other mammals. It is sometimes called the “love hormone,” because people produce it when they become close with someone. It is also involved in a woman’s feelings toward her babies. Women produce a lot of oxytocin during and after childbirth. Scientists believe this makes mothers feel more connected to their babies.

I The scientists at Duke University, in North Carolina, U.S.A., studied macaques, another kind of monkey. They wanted to see how the macaques responded to larger-than-normal amounts of oxytocin. In the experiment, some of the monkeys breathed in the hormone. Then they had to make a choice: drink a cup of fruit juice or give it to another monkey. The ones who got extra oxytocin were more likely to give their fruit juice to other monkeys. This may show that oxytocin improves social skills and makes us more aware of others.

Macaques enjoy a hot spring in Japan.

UNDERSTANDING THE READING

- **A UNDERSTAND THE MAIN IDEA** What is the overall main idea of the two studies? Choose the correct option.

Brown capuchins and macaques ...

- a. have fewer social skills than humans.
- b. feel good when they get treats.
- c. show feelings in similar ways to humans.

- **B UNDERSTAND DETAILS** Match the ideas from Study 1 (1–4) to the correct categories (a–d).

- 1. ____ Unfair treatment made capuchins angry.
 - 2. ____ Brosnan gave unequal rewards to pairs of capuchins.
 - 3. ____ Brosnan wanted to find out if capuchins expect fair treatment.
 - 4. ____ Some primates, such as capuchins, expect fair treatment.
- a. purpose of the study
 - b. how the study was done
 - c. what researchers noticed
 - d. what researchers concluded

- **C UNDERSTAND DETAILS** Complete the summary of Study 2 with details from the reading passage. Write one or two words from the reading passage in each space.

Scientists wanted to know if the hormone ¹_____ would change the behavior of monkeys, so they tested this out on ²_____. Some of the monkeys breathed in the hormone. After that, the monkeys were given a choice: they could choose to ³_____ some fruit juice, or give it to ⁴_____. The results showed that monkeys who got ⁵_____ oxytocin were more likely to give their juice away. Scientists concluded that the “love hormone” improves social skills and makes us more ⁶_____ of others.

- **D IDENTIFY PRONOUN REFERENCES** Find these sentences in the reading passage. Then choose the noun that each underlined pronoun refers to. Check your answers with a partner.

- 1. Scientists study capuchin monkeys because they have strong social bonds.
 - a. capuchins
 - b. scientists
- 2. She trained each monkey to give her a small token.
 - a. Lance
 - b. Brosnan
- 3. They wanted to see how the macaques responded to larger-than-normal amounts of oxytocin.
 - a. the scientists
 - b. the macaques

Review
this Reading
Skill in
Unit 5.

- **E APPLY** Work with a partner. How do you think humans would respond in experiments similar to the ones with the capuchins? Would they respond in a similar or different way?

Critical Thinking

VOCABULARY EXTENSION

WORD LINK -er and -or

Nouns that end with the suffixes *-er* and *-or* often refer to a person or thing that does something. For example, a *trainer* is someone who trains people or animals.

- **A** Complete each sentence with the correct noun form of the words below.

bake collect compose farm instruct invent own visit

1. Someone who has a pet is a pet _____.
2. Someone who grows crops is a(n) _____.
3. Someone who writes music is a(n) _____.
4. Someone who teaches a skill like yoga or driving is called a(n) _____.
5. Someone who goes to see tourist attractions is a(n) _____.
6. Someone who makes bread is a(n) _____.
7. Someone who buys and keeps rare objects is a(n) _____.
8. Someone who creates new products or ideas is a(n) _____.

WORD FORMS Homonyms

Homonyms are words that are spelled and pronounced in the same way but have different meanings. For example, a *bat* is a thick stick, usually made of wood, that is used in some sports. A *bat* is also a small flying mammal.

- **B** Match each word (1–5) with the two best definitions (a–j). Use a dictionary to help you.

- | | | |
|-----------------------|--------------------------------|--|
| 1. _____, _____ fair | a. equal | f. a subject area |
| 2. _____, _____ field | b. a living thing, like a tree | g. to be in charge of a group |
| 3. _____, _____ lead | c. having light-colored hair | h. a main part for an actor in a movie |
| 4. _____, _____ plant | d. a strength of mind | i. a type of legal document |
| 5. _____, _____ will | e. a factory | j. an area of land |

EXPLORING WRITTEN ENGLISH

LANGUAGE FOR WRITING Making Comparisons

We use the comparative form of adjectives to talk about similarities and differences between two things. We can also use other words and expressions for making comparisons.

Showing Similarities

Use **Both** ... **and** and **Like** ... to show similarities within a sentence.

Both gorillas **and** chimpanzees use tools.

Like gorillas, chimpanzees are endangered.

Use **Similarly**, to show similarities between sentences.

Gorillas mainly eat plants. **Similarly**, monkeys are mostly herbivores.

Showing Differences

Use **Unlike** ... and **While** ... to show differences within a sentence.

Unlike gorillas, monkeys have tails.

While dogs need to be washed, cats can clean themselves.

Use **In contrast**, and **However**, to show differences between two sentences.

Monkeys live about 30 years. **In contrast**, apes can live almost 60 years.

Dogs are easily trained. **However**, it is very difficult to train a cat.

Notes:

- Use a comma after a phrase with *like*, *unlike* and *while*.
- Add a comma after the words *similarly*, *however*, and *in contrast*.

- **A NOTICE** Read the sentences. Write **S** if the sentence describes a similarity, and **D** if it describes a difference. Then underline the words in the sentences that show similarities and differences.

Critical Thinking

- ____ Both chimpanzees and gorillas use tools.
- ____ Unlike humans, dogs cannot solve complex problems.
- ____ Giraffes eat plants. In contrast, lions eat meat.
- ____ Like humans, gorillas can plan and solve problems.
- ____ Humans get angry if they are treated unfairly. Similarly, capuchin monkeys do not like unequal treatment.
- ____ Elephant seals are able to stay underwater for long periods of time. However, humans can't stay underwater for a long time without special equipment.
- ____ While goldfish can live in a small pond, whales need a large amount of water to survive.
- ____ Some birds, such as crows, are not very scared of humans. Most birds, however, see people as a threat.

B APPLY Use the words or phrases in parentheses to link the sentences.

1. Humans can make tools. Dogs cannot make tools. (unlike)

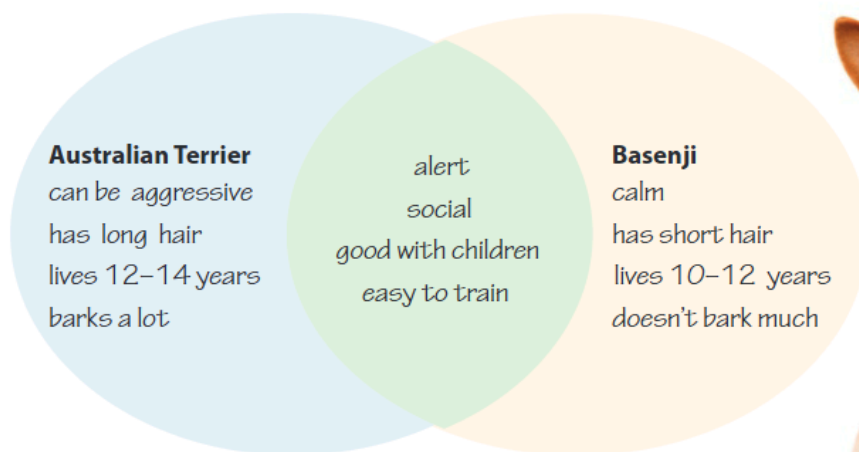

2. Apes eat insects. Bats eat insects. (both ... and)

3. Birds lay eggs. Mammals give birth to live babies. (in contrast)

4. Capuchins live in the Western Hemisphere. Macaques live in the Eastern Hemisphere. (however)

5. German shepherds can become guide dogs. Capuchin monkeys can be trained to help people. (similarly)

C APPLY Look at the Venn diagram of two dog breeds. Use your dictionary to look up any words you don't know. Then discuss with a partner: How are Australian Terriers and Basenjis similar? How are they different?

D APPLY Write sentences about the Venn diagram in Exercise C. Use the words and phrases below.

Both ... and ...
Like ... ,

Similarly, ...
While ... ,

However, ...
In contrast, ...

WRITING SKILL Writing a Comparison Paragraph

In a comparison paragraph, we normally write about either similarities or differences. Each supporting idea describes a similarity or a difference about the two things that we're comparing. The details give examples to explain the similarities or differences. The structure generally looks like this:

1. Topic sentence (state the two items you are comparing)
2. Supporting idea 1 (name a similarity or difference, e.g., in size, color, behavior, etc.)
3. Details for 1 (provide an example or more information)
4. Supporting idea 2
5. Details for 2
6. Supporting idea 3
7. Details for 3

• • • **E** Form a comparison paragraph by putting the sentences in order (1–7).

- a. ____ Lastly, the two animals share the same conservation status.
- b. ____ Both are found in the wild throughout Africa and parts of Asia.
- c. ____ First of all, they look similar.
- d. ____ Leopards and cheetahs share a number of similarities.
- e. ____ Secondly, they live in similar regions of the world.
- f. ____ They are listed as “vulnerable” by the IUCN (International Union for Conservation of Nature).
- g. ____ Both are large, cat-like animals with a spotted pattern on their fur.

• • • **F** Read the paragraph below. Then write a suitable topic sentence to begin it.

_____. **Firstly**, while leopards and cheetahs look similar, it's quite easy to tell them apart. Cheetahs are much slimmer than leopards, and the markings on their fur are quite different. **Also**, cheetahs are much faster. Leopards can reach speeds of around 60 km/h over a short distance, but cheetahs are known to reach around 120 km/h. **Lastly**, their hunting behavior is different. Leopards usually hunt at night and move quietly to surprise their prey. **However**, cheetahs hunt during the day and use their great speed to chase down other animals.

Review
this Writing
Skill in
Unit 3.

• • • **G** Match the words in bold in the paragraph above to words that have a similar meaning.

- | | |
|-----------------|------------------|
| 1. ____ Firstly | a. Finally |
| 2. ____ Also | b. To begin with |
| 3. ____ Lastly | c. In contrast |
| 4. ____ However | d. What's more |

WRITING TASK

GOAL You are going to write a **paragraph** on the following topic:
Compare the characteristics and behavior of two kinds of animals.

A BRAINSTORM Make a list of three animals that you are familiar with. Use the ones you read about in this unit or your own ideas. Next to each one, make notes on what you know about it.

Animal	Characteristics/Behavior

Review this Writing Skill in Unit 4.

B WRITE DETAILS Look at your notes from Exercise A. Choose two animals that you want to compare. Decide whether you want to write about their similarities or differences.

Review this Writing Skill in Unit 3.

C WRITE A TOPIC SENTENCE Read the topic sentence below. How could you improve it? Write a better topic sentence. Then share your ideas with a partner.

Gorillas and monkeys are different.

D PLAN Use the information in Exercises A and B to complete an outline for your paragraph.

OUTLINE

Topic: Compare two animals

Topic Sentence: _____

Supporting Idea (Similarity/Difference 1): _____

Details: _____

Supporting Idea (Similarity/Difference 2): _____

Details: _____

Supporting Idea (Similarity/Difference 3): _____

Details: _____

- E FIRST DRAFT** Use the information in your outline to write a first draft of your paragraph. Use words and phrases to make comparisons. Refer to the writing model below to help you.

WRITING MODEL

There are two main species of gorillas—the western lowland gorilla and the eastern lowland gorilla. While they are very similar, there are a few ways in which they are different. First of all, as their names suggest, they live in separate parts of Africa. Their habitats are about 900 kilometers apart. Secondly, though both animals are large, western gorillas are slightly smaller than eastern gorillas. Western gorillas weigh up to about 180 kilograms, while the weight of eastern gorillas can be up to 220 kilograms. Finally, the hair on the gorillas' bodies differs slightly. Eastern gorillas have darker and longer hair, especially on their arms.

- F PARAPHRASE USING SYNONYMS** Look at your first draft. Find words that you repeat. Can you paraphrase those words with synonyms?

- G REVISED DRAFT** Now use the questions below to revise your paragraph.

- ☐ Did you include a topic sentence?
- ☐ Did you include three supporting ideas?
- ☐ Did you include at least one detail for each supporting idea?
- ☐ Did you use language for making comparisons correctly?

- H FINAL DRAFT** Follow these steps to write a final draft.

1. Check your revised draft for mistakes with language for making comparisons.
2. Now use the checklist on page 203 to write a final draft. Make any other necessary changes.
3. Work in pairs and read your partner's final draft. Give feedback on each other's paragraphs.
